

PATNAM SHIVA CHANDRA PRASAD

✉ shivachandra4022@gmail.com

☎ +919052028929

📍 Hyderabad, Telangana

Summary

As a computer science graduate, my objective is to secure a position that provides an opportunity to apply my theoretical knowledge and practical skills in software development and computer programming while continuously learning and growing in a dynamic and challenging work environment.

Education

B.Tech in Computer Science and Engineering (AI & ML),

2020 – 2024

CMR Institute of Technology

Hyderabad

Technical Skills

Tools & Technologies — GIT, SQL

Programming Languages — C Programming, Python, Cobol

Projects

Personal Portfolio Website [🔗](#)

Impressive portfolio website highlighting my education, skills, and projects, built with HTML, CSS, and Bootstrap.

A deep learning approach for robust detection of bots in Twitter using transformers

Developed a machine learning based web application to identify automated bot accounts on social media, improving content reliability.

- Technologies - Python, Transformers (NLP), dense neural network, logistic regression
- Model implementation - designed a feature engineering pipeline that combines user metadata with semantic text descriptors to generate comprehensive user account representation
- Performance optimization - conducted comparative analysis of multiple classification algorithms, achieving a peak accuracy of 75.56% using a logistic regression model

Modelling and Predicting Cyber Hacking Breaches

Engineered a predictive security framework for cyber supply chains using ML and cyber threat intelligence

- Processed large scale datasets (Microsoft malware prediction) to model threat actor TTP's and IoC's
- Delivered a scalable framework that enables automated vulnerability assessment and dynamic security control

Certifications

- **Fundamentals of Deep Learning** — NVIDIA
- **Edugene technologies python internship**
- **The Complete 2024 Web Development Bootcamp** — udemy
